

# California OES Weather Threat Briefing

Saturday, June 1, 2019  
9:00 AM PDT

**Day 1: Chance of showers and thunderstorms over the Sierra and adjacent foothills, as well as mountains/inland valleys of Southern Region. Locally heavy rainfall is possible with any thunderstorm that passes over an area.**

**National Weather Service**  
*Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**06/01/19 - 06/07/19**

## **Saturday-Sunday**

- A chance of showers and thunderstorms will continue in the afternoons and evenings, mainly over the Sierra and adjacent foothills, as well as the mountains and some inland valleys across Southern Region.
  - Locally heavy rainfall is possible with any thunderstorm that passes over an area.
  - Since winds above the surface will be quite light across Southern Region, any showers and thunderstorms that form will be slow moving, and could linger in any one location for an extended period of time.
    - This will lead to a threat of flash flooding Saturday afternoon and evening across the mountains of Santa Barbara and Ventura Counties, the mountains and interior valleys of San Luis Obispo County, the Cuyama Valley, and the mountains of Los Angeles County (excluding the Santa Monica Range).
  - Hail and strong, gusty winds may also be possible with isolated storms across Inland Region

## **Monday-Friday**

- Potential heat related impacts across the northern Sacramento Valley on Monday, spreading south to the San Joaquin Valley Tuesday and Wednesday
  - A slow cooling trend is generally expected across the state for Thursday-Friday
- Isolated showers and thunderstorms continue to be possible, primarily over the Sierra

# CALIFORNIA WEATHER IMPACTS

06/01/19 - 06/07/19

<u>Hazards / Day</u>	SAT	SUN	MON	TUE	WED	THU	FRI
